Northwestern Michigan College, Traverse City

SOLAR POWERING MICHIGAN

BRINGING PEOPLE TOGETHER

Solar Powering Michigan will engage utilities, policy makers, lenders, developers & contractors, local governments, and training & workforce development professionals to help them define opportunities in the solar market and access resources and networks to advance projects.

TO GROW SOLAR IN MICHIGAN

Topics covered at the conference include project finance, shared solar, PACE programs, state and utility programs, permitting and interconnection, Michigan Renewable Portfolio Standard (RPS), storage and demand response, third party ownership, local market development and workforce training.
